## Internal Policy Handbook for RAG Testing

Document version: 1.0 | Effective date: 01 July 2026 | Owner: People Operations

### Purpose

This sample handbook is created for testing document upload, PDF extraction, chunking, vector search, metadata retrieval, and question answering in a RAG application. The policies below are fictional but written like a real company document so that the system can retrieve facts from different pages.

### How to use this file

Upload this PDF into the RAG application. After ingestion, ask questions such as: How many casual leaves are allowed? What is the reimbursement deadline? What is the remote work rule? Which page mentions data retention? The answer should cite the retrieved section or page metadata if your application supports citations.

### Table of Contents

| Section | Topic                                  | Expected page |
|---------|----------------------------------------|---------------|
| 1       | Leave and Attendance Policy            | 2             |
| 2       | Remote Work and Equipment Policy       | 3             |
| 3       | Expense Reimbursement Policy           | 4             |
| 4       | Information Security and Data Policy   | 5             |
| 5       | Customer Support and Escalation Policy | 6             |

# **1. Leave and Attendance Policy**

## **1.1 Working Hours**

Standard working hours are 9:30 AM to 6:30 PM from Monday to Friday. Employees are expected to be available for core collaboration hours from 11:00 AM to 4:00 PM. A lunch break of 45 minutes is included in the working day.

## **1.2 Casual Leave**

Employees receive 12 casual leave days per calendar year. Casual leave should be applied at least 2 working days in advance unless the leave is due to an emergency. Unused casual leave does not carry forward to the next calendar year.

## **1.3 Sick Leave**

Employees receive 8 sick leave days per calendar year. For sick leave of more than 2 consecutive working days, the employee may be asked to provide a medical certificate. Sick leave is intended only for health-related absence.

## **1.4 Late Arrival**

Arrival after 10:00 AM is considered late unless approved by the reporting manager. Three late arrivals in one month may be counted as half-day leave. This rule does not apply when there is an approved flexible work arrangement.

## **1.5 Attendance Regularization**

Missed check-in or check-out entries must be regularized within 3 working days. Requests submitted after this window require manager and HR approval.

## **2. Remote Work and Equipment Policy**

### **2.1 Remote Work Eligibility**

Employees may work remotely up to 2 days per week after completing 30 days of employment. Remote work must be approved by the reporting manager and should not impact team availability, delivery timelines, or client commitments.

### **2.2 Work From Anywhere**

Employees may request work from another city for up to 10 working days in a quarter. International work-from-anywhere requests require approval from HR, Finance, and Legal because tax, payroll, and data protection rules may apply.

### **2.3 Company Equipment**

Company laptops, monitors, and access cards remain company property. Employees must return all equipment within 5 working days after resignation, termination, or project exit. Damaged or lost equipment must be reported within 24 hours.

### **2.4 Internet Reimbursement**

Eligible employees may claim internet reimbursement up to INR 1,000 per month. Bills must show the employee name, billing month, and service provider. Claims without a valid bill may be rejected.

### **2.5 Device Security**

Only company-approved devices should be used for production access. Personal devices are not allowed for customer data download, database access, or production system administration.

### **3. Expense Reimbursement Policy**

#### **3.1 Claim Submission Deadline**

Expense claims must be submitted within 15 calendar days from the expense date. Claims submitted after 15 days require approval from the department head and Finance team.

#### **3.2 Travel Expenses**

Domestic travel requires prior approval from the reporting manager. Economy class is the default travel class. Cab receipts, hotel invoices, and boarding passes must be attached to the reimbursement request.

#### **3.3 Meal Reimbursement**

Meal reimbursement during approved business travel is capped at INR 800 per day. Alcohol, tobacco, personal entertainment, and family expenses are not reimbursable.

#### **3.4 Client Meeting Expenses**

Client meeting expenses must include the client name, meeting purpose, date, attendee list, and original invoice. Expenses above INR 5,000 require prior written approval from the business head.

#### **3.5 Payment Timeline**

Approved reimbursement claims are normally processed within 7 working days. The payment timeline may be longer during payroll freeze periods or audit reviews.

## **4. Information Security and Data Policy**

### **4.1 Password and MFA**

Employees must use strong passwords with at least 12 characters. Multi-factor authentication is mandatory for email, VPN, cloud dashboards, source code repositories, and production support tools.

### **4.2 Data Classification**

Company data is classified into Public, Internal, Confidential, and Restricted categories. Customer personal data, insurance claim details, salary files, and access tokens are treated as Restricted data.

### **4.3 Data Retention**

Customer support tickets are retained for 3 years. Audit logs are retained for 7 years. Temporary exported reports containing customer information must be deleted within 30 days unless Legal Hold applies.

### **4.4 Sharing Restrictions**

Restricted data must not be shared through personal email, public chat applications, or unapproved file-sharing services. External sharing requires manager approval and a valid business reason.

### **4.5 Incident Reporting**

Suspected data leaks, phishing attempts, lost devices, malware alerts, or unauthorized access must be reported to the Security team within 1 hour of discovery.

## 5. Customer Support and Escalation Policy

### 5.1 Support Priority Levels

Priority 1 means a production system is unavailable for multiple customers or there is a confirmed data breach. Priority 2 means a major feature is broken but workaround exists. Priority 3 means a normal defect or service request.

### 5.2 Response Time Targets

| Priority | Initial response target | Update frequency       |
|----------|-------------------------|------------------------|
| P1       | 15 minutes              | Every 30 minutes       |
| P2       | 1 business hour         | Every 4 business hours |
| P3       | 1 business day          | Every 2 business days  |

### 5.3 Escalation Path

If a P1 incident remains unresolved for more than 60 minutes, it must be escalated to the Engineering Manager, Product Owner, and Customer Success Lead. A post-incident review must be completed within 3 working days after resolution.

### 5.4 Customer Communication

Customer-facing updates must be clear, factual, and approved by the Customer Success Lead for P1 incidents. Internal investigation notes should not be copied directly into customer emails.

### 5.5 Knowledge Base Updates

When a repeated issue is resolved, the support engineer should create or update a knowledge base article within 5 working days. The article should include symptoms, root cause, workaround, and final resolution.
